Be sure to add me to your. Please visit our ebay store for more great items. We specialize in Printed Circuit Board Assembly Electronics Manufacturing Equipment. Thanks for visiting. Internal no. 13939 I guarantee all of my items no questions asked. I did not open this unit and replace any batteries or mess with anything. I was told it uses 2 9 volt batteries. Please refer to all of my photos as they are part of my description also please ask any questions prior to bidding. This auction is for a vintage ANDERSON STATIC ELECTRICITY METER. It is from the early 1970s and was owned by the Long Beach Naval Shipyard. The Anderson Static Meter is a little pink cast aluminum box. It has a small meter on the front and the tritium source on the end. Anderson also made a product line of antistatic bags for CMOS integrated circuits. So the pink color scheme was used throughout their products to distinguish the antistatic. The full name of the company was Anderson Effects, Inc. and the meter was manufactured by B.K. Sweeney as shown in the sealed radioactive source registry. Please ask any questions prior to bidding Also please refer to photos as they are part of my description.

Thanks you Return Policy It is very important to us that all of our customers are happy with our transactions. If you are not satisfied for any reason contact us within 14 days of confirmed receipt of an item and we will be happy to work it out with you. Please do not leave neutral or negative feedback until we have had the chance to resolve any issues. Preferred method of payment is Paypal but I am willing to discuss other options with you before the end of auction. A Chapman static meter model 410. Takes two 9 volt batteries. The old ones were fairly corroded. But they came out and the contacts cleaned up fairly well. The little ends of the 9 V. pads on one of the attachments was starting to come apart, but the contacts still stick to the battery. The zero adjustment knob moves the needle, and it will jump right up to close to and then drift center dial. I was unable to get it to register any noticeable static even with vigorous rubbing of foam and cardboard on my head. I was, however, in the damp basement of a surplus store, so static conditions were less than ideal. The thing is still awesome looking, and just generally pleasing to hold. ZAP. Were a surplus store. And we aren't experts with most of this stuff. So, we don't make any guarantees. Please note that international shipping will cost more than domestic. Feel free to contact us with any questions via ebay. By giving us a call during business hours at 651.646.8653, or by visiting our St. Paul store! Ideal for PCB work. Was used to test factory airborne dust that would accumulate on circuit boards and controls. Will come in a leather case. 120 VAC power supply, and grounding cable. I great piece of test equipment to help aid in corrective actions. Free shipping to the lower 48 states only. Check out my! THANK YOU FOR YOUR BUSINESS! It was my father's which he used in numerous manufacturing facilities from steel making to pots and pans manufacturing.
